

ABOUT THE PROJECT

This hospice saw an opportunity in DIRTT to modernize its headquarters facility while maintaining a calm and welcoming atmosphere for clients and their families. Carefully positioned glass surfaces ensure every part of the interior has a view of the surrounding redwood forest. Writeable surfaces and media walls provide the technical support staff and volunteers need in training, conference and grief counseling rooms. Large-scale graphics bring a warmth to the space, while DIRTT Millwork and imbedded Power provide storage and the flexibility to adapt the space over time. And as a non-profit organization, the hospice recognized DIRTT's fresh new look is a cost-effective investment in its staff, clients and future.

SOLUTIONS

- Pivot and barn doors
- Combination, solid and glass clerestory walls
- DIRTT Millwork
- DIRTT Power
- Media wall
- LED lighting
- Seismic

FINISHES

- Back painted glass
- Clear tempered glass
- Direct to substrate graphics on Chromacoat
- Chromacoat
- Thermofoil
- Write Away
- Tackable tile
